STORIA FLOORING

"European oak introduces an organic warmth that complements the sculptural geometry of the walls and millwork of this Miami residence," says Storia founder Santiago Estevez. "While the space is guided by its architectural forms and the subtle harmony of color, the floor adds a striking contrast through its natural movement and variation within the grain. The natural color changes from plank to plank, introducing depth, texture, and visual interest throughout the home." storiaflooring.com

ROMANZA INTERIOR DESIGN

"The study in this Naples estate in Port Royal makes the most of space," says designer Michael Scott. "Lit-from-within golden oak bookcases with spindle legs span an entire wall and offer ample storage below. This golden hue is also repeated in the finish of the custom-designed desk, with integrated filing cabinets paired with a black leather chair. Overhead is a polished nickel and linen shade light fixture suspended from the cove-lit ceiling. A floor-to-ceiling window is framed by patterned draperies." romanza.com
